

## Mac Operating Systems:

In order to run the Decorators® Deck Visualizer on a Mac, you *must* perform the steps below or Java will not load properly and the app will not run.

1) Click on the **Hard drive** or hard disk that shows on your desktop. You can also hit APPLE+N to open a new finder window.

NOTE: If the hard disk doesn't show, do this:

- a) Click **Finder** (in the top)
- b) Click **Preferences**
- c) Under Show items: choose **Hard Disk**

2) Click **System**

3) Click **Library**

4) Click **Java**

5) Control Click or right click on **Extensions**

6) Click **Get Info**

7) Click on **Name & Extension**

8) Rename to something like OldJava or Extensions Old.

9) Put in password (if applicable) to save changes.

10) Once you have verified that the rename took, re-launch the browser and try loading the app again. It should load without issue. If you continue to have difficulties email [dk\\_support@diyonline.com](mailto:dk_support@diyonline.com).
