1.0 SCOPE OF EVALUATION

1.1. This research report addresses compliance with the following Codes:

NOTE: This report references 2018 Code sections with [2015] Code sections shown in brackets where they differ.

1.2. Deck and porch boards have been evaluated for the following properties:
- Structural Performance
- Durability
- Surface Burning

1.3. *Eovations™, Deckorators®, SLS Composite, Ultra Light* deck and *Porch* boards are intended for use as a walking surface on exterior decks, balconies, porches, and walkways, including stairs in One- and Two-Family Dwellings regulated by the IRC and other construction types regulated by the IBC in accordance with IBC Section 705.2.3 [1406.3] *Combustible projections*, where fire-resistance rated floor construction is not required for the deck or balcony.

2.0 STATEMENT OF COMPLIANCE

*Eovations™, Deckorators®, SLS Composite, Ultra Light* deck and *porch* boards comply with the Codes listed in Section 1.1, for the properties stated in Section 1.2 and uses stated in Section 1.3, when installed as described in this report, including the Conditions of Use stated in Section 6.0.

3.0 DESCRIPTION

3.1. *Eovations™, Deckorators®, SLS Composite, Ultra Light* Deck Boards are thermoplastic composite deck boards, co-extruded using proprietary inorganic fillers and polypropylene (PP) materials with a polypropylene cap.

3.2. Finished deck boards are available in solid or slotted rectangular profiles.

3.2.1. *Eovations™* deck boards are provided with nominal dimensions of 5.3 inches wide and 0.75 inches thick. See Figure 1.

3.2.2. *SLS Composite* and *Ultra Light* deck boards are provided with nominal dimensions of 5.2 inches wide and 0.800 inches thick. See Figure 2.

3.2.3. *Deckorators® Vault* and *Frontier* deck boards are provided with nominal dimensions of 5.5 inches wide and 0.835 inches thick. See Figure 3.

3.2.4. *Deckorators® Voyage Varied-Plank Decking* is provided with nominal dimensions of 3.5 inches, 5.5 inches, and 7.25 inches wide and 0.835 inch thick. See Figure 6.
3.2.5. **Deckorators® Dock & Deck Board** is provided in nominal dimensions of 5.5 inches wide and 1.21 inches thick. See Figure 5.

3.3. **Eovations™ Porch** boards are provided with a tongue and groove profile of nominal dimensions of 3.125 inches wide and 0.835 inches thick. See Figure 4.

3.4. Deck boards may be installed via face-fastening using exterior screws or by using hidden fastener systems.

### 4.0 PERFORMANCE CHARACTERISTICS

4.1. Deck and porch boards are rated for a uniform live load of 100 lbs./ft.\(^2\) when installed on support framing spaced at up to 16 or 24 inches (See Table 1).

4.2. Deck and porch boards used as stair treads are rated for the code-prescribed concentrated load equal to 300 lbs. when installed as a continuous board over a minimum of two spans with the maximum specified in Table 1.

4.3. Deck and porch boards have wind uplift resistance ratings as determined by the fastening method. See Table 1.

4.4. Materials used have a flame spread index no greater than 200 when tested in accordance with ASTM E84.

4.5. Materials are deemed equivalent to preservative treated or naturally durable wood for resistance to weathering effects, attack from termites and fungus decay.

4.6. Structural performance has been demonstrated for a temperature range from -20°F to 125°F.

### 5.0 INSTALLATION

Installation shall be in accordance with the manufacturer's installation instructions and this report. Where differences occur between this report and the manufacturer's installation instructions, this report shall govern.

5.1. Solid deck boards may be installed with #7 x 1-7/8-inch Camo™ coated steel screw hidden fasteners. Two fasteners are required at every joist.

5.2. Slotted deck boards are installed with the **Equator®, Camo™, EdgeClip** and **EdgeX Clip Screw hidden fasteners**, **Stowaway™**, or DeckWise hidden fastener systems. For the **Equator® and Stowaway™** hidden fasteners, one fastener is required at every joist. See Figure 7.

5.3. Tongue and groove porch boards are installed with the “T” or “L” cleat nails. One nail is required at every joist. See Figure 8.

### 6.0 CONDITION OF USE

The deck board applications identified in this report are deemed to comply with the intent of the provisions of the referenced building codes subject to the following conditions:

6.1. Deck and porch boards placed at an angle other than 90 degrees to the supporting joist will require support framing at a reduced spacing such that the span of the board does not exceed the span rating specified in Table 1).

6.2. The wind uplift resistance rating recognized in this report is based on attachment to treated Southern Pine framing (specific gravity, G=0.55). Installation on wood framing with a lesser specific gravity may result in a lower wind uplift rating.

6.3. Where required by the building official, engineering calculations and details shall be provided. The calculations shall verify that the anchorage complies with the building code for the type of framing and condition of the supporting construction.

6.4. Compatibility of the supporting construction materials with all metal fasteners are subject to approval by the code official.

6.5. Only those types of fasteners and fastening methods described in this report have been evaluated for the installation of the deck boards; other methods of attachment are outside the scope of this report.

6.6. **Eovations™, Deckorators®, SLS Composite, Ultra Light** Deck and **Porch** boards are manufactured in accordance with the manufacturer's approved quality control system with inspections by Intertek Testing Services NA, Inc.
7.0 SUPPORTING EVIDENCE

7.1. Manufacturer’s drawings and installation instructions.

7.2. Reports of testing and engineering analysis demonstrating compliance with ICC-ES AC174, Acceptance Criteria for Deck Board Span Ratings and Guardrail Systems (Guards and Handrails), revised December 2014, and ASTM D7032-14 [10a].

7.3. Documentation of an Intertek approved quality control system for the manufacturing of products recognized in this report.

8.0 IDENTIFICATION

Eovations™, Deckorators®, SLS Composite, Ultra Light deck and porch boards produced in accordance with this report shall be identified with labeling on the individual deck boards that includes the following information: Name and/or trademark of manufacturer; the Code Compliance Research Report identification and number (CCRR-0195); and the following statement: “See Intertek CCRR-0195 at https://bpdirectory.intertek.com for uses and performance levels.”

9.0 OTHER CODES

This section is not applicable.

10.0 CODE COMPLIANCE RESEARCH REPORT

10.1. Approval of building products and/or materials can only be granted by a building official having legal authority in the specific jurisdiction where approval is sought.

10.2. Code Compliance Research Reports shall not be used in any manner that implies an endorsement of the product by Intertek.

10.3. Reference to the Intertek website address: https://bpdirectory.intertek.com is recommended to ascertain the current version and status of this report.

This Code Compliance Research Report (“Report”) is for the exclusive use of Intertek’s Client and is provided pursuant to the agreement between Intertek and its Client. Intertek’s responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this Report. Only the Client is authorized to permit copying or distribution of this Report and then only in its entirety, and the Client shall not use the Report in a misleading manner. Client further agrees and understands that reliance upon the Report is limited to the representations made therein. The Report is not an endorsement or recommendation for use of the subject and/or product described herein. This Report is not the Intertek Listing Report covering the subject product and utilized for Intertek Certification and this Report does not represent authorization for the use of any Intertek certification marks. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek.
