REPORT SUBJECT:
ALX Contemporary Guardrail Systems

1.0 SCOPE OF EVALUATION

1.1 This Research Report addresses compliance with the following Codes:
• 2018, 2015 International Building Code® (IBC)
• 2018, 2015 International Residential Code® (IRC)

NOTE: This report references 2018 Code sections with [2015] Code sections shown in brackets where they differ.

1.2 The ALX Contemporary Guardrail Systems have been evaluated for the following properties (see Table 1):
• Structural Performance

1.3 The ALX Contemporary Guardrail Systems have been evaluated for the following uses (see Table 1):
• Guards or guardrails under the definitions of the referenced codes.
• Guardrail assemblies are provided as level guards for walking areas such as decks, balconies. Sloped guardrails are for open sides of stairways.

2.0 STATEMENT OF COMPLIANCE

The ALX Contemporary Guardrail Systems comply with the Codes listed in Section 1.1, for the properties stated in Section 1.2 and uses stated in Section 1.3, when installed as described in this report, including the Conditions of Use stated in Section 6.

3.0 DESCRIPTION

3.1 Level guardrails are provided with rail lengths up to 96 inches in length and installed heights of 42 inches measured from the top of the upper rail to the walking surface. See Table 2 for lengths and configurations.

3.2 Stair guardrails are provided with rail lengths up to 76 inches along the sloping length between the inside of supports and an installed height of 42 measured vertically from the top of the upper rail to the leading edge of the stair tread or landing.

3.3 The ALX Contemporary Guardrail Systems are an assemblage of extruded aluminum top rails, bottom rails, brackets, balusters and posts.

3.4 The ALX Contemporary Guardrail top rails are round or rectangular extruded 6060-T6 aluminum. See Figures 1 and 2.

3.5 The ALX Contemporary Guardrail bottom rail is square extruded 6060-T6 aluminum. See Figure 3.

3.6 Zinc die-cast collar brackets for various configurations. See Figures 4-8.

3.7 Round and square extruded aluminum balusters fit into routings in the top and bottom rails. See Figure 9.

3.8 Posts consist of square aluminum extrusions welded to an aluminum base plate that is pre-drilled for anchoring to the supporting structure. See Figures 10 & 11.

3.8.1 The heavy wall post is a 2-1/2 inch square by 0.15 inch wall aluminum extrusion.

3.8.2 The light wall post is a 2-1/2 inch square by 0.080 inch aluminum extrusion.

3.8.3 Heavy and light posts are attached to a 5 inch x 5 inch x 3/8 inch thick aluminum base plate with a 1/4 inch continuous fillet weld.
3.8.4 The base plates have four 3/8 inch diameter holes for attachment to the deck surface.

4.0 PERFORMANCE CHARACTERISTICS

4.1 The guardrail system described in this report has demonstrated capacity to resist design loading specified in Chapter 16 of the IBC and Section R301 of the IRC when tested in accordance with ICC-ES AC 273.

5.0 INSTALLATION

5.1 The ALX Contemporary Guardrail Systems must be installed in accordance with the manufacturer’s published installation instructions, the applicable Code, and this Research Report. A copy of the manufacturer’s instructions must be available on the jobsite during installation.

5.2 Guardrails may be assembled in various configurations identified in Table 2. Refer to Table 3 for the fastening schedule of all system components.

5.3 Posts are anchored to with (4) 3/8” bolts of the type and size suitable for the construction type and condition of the supporting structure. See Section 6.3 under Conditions Of Use for additional requirements

6.0 CONDITIONS OF USE

6.1 Installation must comply with this Research Report, the manufacturer’s published installation instructions, and the applicable Code. In the event of a conflict, this report governs.

6.2 Only those types of fasteners and fastening methods described in this report have been evaluated for the installation of ALX Contemporary Guardrail Systems. Other methods of attachment are outside the scope of this report.

6.3 Anchorage of the structural post is not within the scope of this report and is subject to evaluation and approval by the building official. Anchors must satisfy the design load requirements specified in Chapter 16 of the building code and must meet the following minimum requirements:

6.3.1 A minimum of four anchor bolts must be used and located in the four pre-drilled holes in the structural post base plate.

6.3.2 The anchors must have a minimum nominal diameter of 3/8 inch.

6.3.3 Where required by the building official, engineering calculations and details shall be provided. The calculations verify that the anchorage and supporting structure complies with the building code for the type and condition of the supporting structure.

6.4 The ALX Contemporary Guardrail Systems are manufactured under an approved quality control system with third party inspections by Intertek.

7.0 SUPPORTING EVIDENCE

7.1 Drawings and installation instructions submitted by the manufacturer.

7.2 Reports of testing and engineering analysis demonstrating compliance with the performance requirements of Acceptance Criteria for Handrails and Guards ICC-ES AC 273, revised June 2017.

7.3 Documentation of an Intertek approved quality control system for the manufacturing of products recognized in this report.

8.0 IDENTIFICATION

The ALX Contemporary Guardrail Systems are identified with the manufacturer’s name (Maine Ornamental, LLC), address and telephone number, the product name ALX Contemporary Guardrail Systems, when applicable “For Use in One-and Two Family Dwellings Only.”, the Intertek Mark as shown below, and the Code Compliance Research Report number (CCRR-0280).
9.0 OTHER CODES

This section is not applicable.

10.0 CODE COMPLIANCE RESEARCH REPORT USE

10.1 Approval of building products and/or materials can only be granted by a building official having legal authority in the specific jurisdiction where approval is sought.

10.2 Code Compliance Research Reports shall not be used in any manner that implies an endorsement of the product by Intertek.

10.3 Reference to the https://bpdirectory.intertek.com is recommended to ascertain the current version and status of this report.

This Code Compliance Research Report ("Report") is for the exclusive use of Intertek’s Client and is provided pursuant to the agreement between Intertek and its Client. Intertek’s responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this Report. Only the Client is authorized to permit copying or distribution of this Report and then only in its entirety, and the Client shall not use the Report in a misleading manner. Client further agrees and understands that reliance upon the Report is limited to the representations made therein. The Report is not an endorsement or recommendation for use of the subject and/or product described herein. This Report is not the Intertek Listing Report covering the subject product and utilized for Intertek Certification and this Report does not represent authorization for the use of any Intertek certification marks. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek.
